

USER MANUAL

Flux

A single-group savings and credit system — how to sign in, contribute, borrow, and run the group, role by role.

Contents

1. **Signing In** — getting your account, setting a password
2. **Every Member** — dashboard, contributions, loans
3. **How a Contribution Gets Approved** — the review flow
4. **How a Loan Gets Approved** — dual-approval + eligibility
5. **Chair** — members, roles, group settings
6. **Treasurer** — contributions, loans, investments
7. **Secretary** — minutes, attendance, notices
8. **Mobilizer** — recruitment, notices
9. **Auditor** — ledger, activity log

Signing In

There's no public sign-up. The Chair adds every member by hand, and each person sets their own password from a link the Chair shares with them.

1 Get your link

The Chair sends you a one-time link — by WhatsApp, SMS, or however they reach you.

2 Set your password

Opening the link takes you straight to a "Set Your Password" screen. Choose one (8+ characters) and you're in.

3 Land on your dashboard

Everyone sees the same base dashboard. If you hold an extra role (Treasurer, Secretary, etc.) you'll also see that role's sections on the relevant pages.

Lost your link or forgot your password?

Ask the Chair for a new one — they can generate a fresh link from the Members page at any time.

What everyone can do

Regardless of any extra role you hold, every member has the same base abilities.

Dashboard

- See your own running balance and the group's total fund
- See your most recent contribution and its status
- See notices sent to you (meeting reminders, deadlines, announcements)

Contributions

- Log a contribution any time — there's **no limit** on how often you can contribute
- Attach a photo of your payment proof (mobile money screenshot, receipt) — optional
- See your full contribution history and each one's status
- If one is rejected, you'll see the reason — log a new one to try again

Loans

- Request a loan (amount, reason, number of installments, due date)
- Track its status as it moves through approval
- Repay an active loan at any time, in any amount, until it's fully repaid

Loan eligibility

The Chair sets rules for who can borrow and how much: a minimum time as a member, a cap based on your own savings, and a cap based on a share of the group fund. You'll get a clear message if a request doesn't meet them.

Profile

- Update your name and phone number
- Sign out

3 · THE CONTRIBUTION FLOW

How a contribution gets approved

Every contribution is reviewed once by a Treasurer or the Chair before it counts.

If you pay less than the group's set amount, it's approved as **Partial** rather than rejected — both are recorded honestly.

One rule worth knowing: a Treasurer can't approve their own contribution — that always needs the Chair, so no one can wave their own payment through.

How a loan gets approved

Loans need **two separate people** to approve before any money moves — no single person can push a loan through alone.

WHO CAN APPROVE	Treasurer or Chair — any two different people holding either role
WHAT ONE REJECTION DOES	Ends it immediately — the loan is rejected, no second opinion needed
WHAT YOU OWE	Principal + interest, at the rate set in Group Settings

Chair

Runs the group's setup and has final say wherever it's needed — every other role's oversight abilities are also available to the Chair.

Members

- Add a new member and get a link to share with them
- Grant or remove any role (a person can hold several at once)
- Activate or deactivate an account

Group Settings

- Set the contribution amount, frequency, and monthly deadline
- Set the loan interest rate and type
- Set the three loan eligibility thresholds (minimum membership time, savings multiple, share of the fund)

Also able to: approve contributions, decide loans, log investments, log meeting minutes, send notices, and view the audit log — everything a Treasurer, Secretary, Mobilizer, or Auditor can do.

Treasurer

Controls what counts as money received or invested.

- Approve or reject member contributions (except your own — ask the Chair)
- Give one of the two required approvals on a loan
- Log a new investment (what, how much, expected return)
- Record an investment's actual return when it comes back — the profit (or loss) is added straight to the group ledger

Secretary

Keeps the group's written record.

- Log meeting minutes (date + what was discussed/decided)
- Mark who attended a meeting
- Send a notice to every member (meeting reminder, deadline alert, announcement)

Mobilizer

Keeps the group informed and growing.

- Send a notice to every member — the same tool the Secretary uses

Auditor

Independent, read-only oversight — the Auditor can see everything but approve nothing.

- View every ledger entry the group has ever recorded
- Export the full ledger as a spreadsheet (CSV)
- View the activity log — who did what, and when

Every contribution, loan disbursement, repayment, and investment return is recorded permanently once it happens — nothing can be edited or deleted afterward, only added to. That's what makes the ledger something an Auditor can actually trust.
